

Alkaline Primary Battery

Sabik's range of alkaline buoy batteries have been developed to be used as a single power supply for a light signal on floating or fixed devices in marine environment. The battery is made of alkaline cells containing 0 % lead or cadmium, classified as environmental friendly. The batteries can be disposed off at regular waste disposal stations. A manufacturer's environment certificate available on request. The housing is made of corrosion free polyethylene. Both the top and the bottom are welded to the pipe, forming a completely waterproof package. The batteries are supplied with double insulated PVC connection cables. They can even be supplied to be used submerged.
